

Trailer floor

Lantor Soric® is used in this product:

- To reduce weight
- To increase stiffness

Description:

In order to optimize the design of the product Soric® was taken into the development of the trailer. The set goals relating to reducing weight and stiffness were met and as a result Soric® core material was chosen.

In addition due to good flow characteristics production times of the trailer floors are decreased.

Production technology:

RTM light

Laminate build-up:

Gelcoat
Combination Mat
Lantor Soric®
Combination Mat

Resin type:

Polyester resin
